Subject: Traffic Calming

In regard to Mr. Steve Rose's e-mail and his upcoming memo, I would like to formally list some of the reasons I believe traffic calming is required on Crawford Street.

It seems the worst area is between James Street and Patterson Place. I frequently observe vehicles running the stop sign, speeding and unfortunately using hand held devices. Crawford Street is a great residential area, we have two large parks in the area including schools nearby. Crawford is the route most children take to either go to these parks or to their school. Crawford also seems to be a very popular street for families to walk their dogs along with their children. As a matter of interest, we also have a mentally challenged young man that happens to live two doors down from me, he to, also loves to walk the street. For these reasons, I believe all the residents of Crawford Street, would be extremely grateful for the addition of traffic calming equipment on our street.

Should you require any additional information feel free to contact me.

Best Regards,

Rob Cochrane
