Subject: Public Notice D30-006-2023, 259 Salem Road/910 Essa Road

Good Morning Michele,

Having just returned from vacation I am reviewing the public notice for the proposed zoning amendments in relation to the property directly on Salem Road.

I have several questions concerning these proposals and how they may have an impact on my own properties both now and in the future.

Many of my questions are related to the development of infrastructure such as water and sewer and what that will mean for my land?

I am obviously curious about the location of possible intersections and how that will impact my lands also?

I am not sure if you can shed light on these possible impacts, but would certainly appreciate any insights you may provide.

I would also like to be noted as a concerned citizen and would like to be kept informed about any and all decisions and concerns related to this development.

I have already made Counsellor Harvey aware of my concerns in relation to road safety and traffic concerns along Salem Road due to the impact of developments that are already underway in the area. The impact of construction equipment and additional traffic, largely due to the City's delay in improving Salem Road and the closure of Veterans Drive, and the large number of additional residential units at Essa Road and Salem Road, has already been noticeable and a cause for concern.

I appreciate your time and look forward to any insight you may provide.

Sincerely,

Jonathan Watt
