

Staff Report

To	General Committee
Subject	Subdivision Parking Control – 225 Prince William Way, BEMP II / Great Gulf (9 Mile), Hewitt’s Gate East, Hewitt’s Gate West, Yonge GO Village Phase 1 and 2
Date	February 26, 2025
Ward	9 and 10
From	M. Banfield, RPP, Executive Director of Development Services
Executive Member Approval	M. Banfield, RPP, Executive Director of Development Services
CAO Approval	M. Prowse, Chief Administrative Officer
Staff Report #	DEV006-25

Recommendation(s):

1. That Traffic By-law 2020-107 Schedule “1” “No Parking Anytime” be amended by adding the following as approved by Council motion 23-G-208 concerning the Parking Control for New Subdivisions (Secondary Plan and Built Boundary):
 - a) 225 Prince William Way, as identified in Appendix A to Staff Report DEV006-25;
 - b) BEMP II / Great Gulf (9 Mile), as identified in Appendix B to Staff Report DEV006-25;
 - c) Hewitt’s Gate East and Hewitt’s Gate West, as identified in Appendix C to Staff Report DEV006-25; and
 - d) Yonge Go Village Phase 1 and 2, as identified in Appendix D to Staff Report DEV006-25.
-

Executive Summary:

The purpose of this staff report is to seek Council approval to amend Traffic By-law 2020-107 to implement parking controls for the new subdivisions noted in the recommendation. Council approved motion 23-G-208 providing direction for implementing parking controls for new subdivisions as follows:

“That staff in the Development Services Department proceed with the following parking control approach for new subdivisions in the secondary plan areas and the built boundary:

Street Classification	Parking Control
Laneways	Parking prohibited
Local Streets	Parking permitted on one side only
Collector Streets	Parking prohibited (DEV003-23)”

Key Findings:

As residential development progresses in the City’s south end, there is a need to amend the Traffic By-law to implement planned parking controls as new subdivisions become occupied. Parking controls are based on street classifications within subdivisions. **Staff Report DEV003-23 outlines the rationale for parking controls.** In summary, the street cross-sections within the City’s secondary plan areas were designed to be narrower to support an overall development approach to create a more compact built form.

Parking controls are required on laneways and local streets to provide a clear width for fire access. Parking controls are required on collector streets as they were not designed to accommodate on-street parking.

Parking controls provide the following ancillary benefits:

- Facilitates winter maintenance by providing necessary clear widths;
- Facilitates access of emergency vehicles; and,
- Allows for school buses to travel on local streets.

Parking controls will be implemented based on the developer’s phasing, progression and the occupancy of the units within the subdivision. Staff will complete a mailout to property owners providing 30 days’ advance notice of enforcement once no-parking signs have been installed by the developer and verified for correctness by City staff. The Ward Councillor will be notified when the mailout occurs and provided a copy of the letter. As subsequent phases within these developments are completed (and no-parking signs installed), staff will repeat the process of providing 30 days’ advance notice of enforcement including notification to the Ward Councillor.

Financial Implications:

There are no costs associated with the implementation of parking control signs as they are supplied and installed by the developer. Additional By-law enforcement costs in the secondary plan areas were included in the 2021 Enforcement Services Review.

Alternatives:

The following alternatives are available for consideration by General Committee:

Alternative #1 – General Committee could choose to not implement parking controls.

Although alternative is available, it is not recommended as the proposed parking controls are based on the design of the street cross-section. Parking controls provide minimum fire access clear width, facilitate access for waste collection, school buses, emergency vehicles and supports operation and maintenance activities.

Strategic Plan Alignment:

Affordable Place to Live		
Community Safety	X	The recommendation to implement parking controls will improve safety by facilitating vehicle travel, emergency and maintenance vehicle access on laneways and local streets, allow for school buses to traverse local streets where desired by the Simcoe County School Bus Consortium and accommodate installed cycling infrastructure on collector streets.
Thriving Community		
Infrastructure Investments		
Responsible Governance		

Additional Background Information and Analysis:

Staff report [DEV003-23](#) provides rationale for required parking controls.

Consultation and Engagement:

There is no public consultation required in relation to this Report. Residents will be mailed letters providing advance notice of enforcement as portions of subdivisions are occupied.

Environmental and Climate Change Impact Matters:

There are no environmental and/or climate change impact matters related to the recommendation.
