**Subject:** 50 Wood Street

Good day.

I will be making an oral presentation this evening in regards to the development at 50 Wood Street, Barrie, but I do wish to go on written record that I have serious concerns in regards to the amount of the chemical Trichloroethylene (TCE) that currently exists on this property. I am also concerned about what the effect will be by changing the course of Hotchkiss Creek, and also digging up the soil in the entire area will have on the environment, specifically downstream and into Lake Simcoe.

Sincerely,

Arnie Ivsins
