

Exhibits A

Steel Street East Side of Johnson St

showing cars from rental properties parking on street and in driveway. Because there are so many cars in the driveways they can not back out so they park on street. They do not use the garage to park and drive over lawns to get out in some cases. This is a bus route for public transit and school buses. A lot of construction vehicles use this route some times so cars have to stop to wait to pass.

Steel Street West side of Johnson St

In this picture there are 7 cars in driveway and some times 8. This is a one car carport and driveway. The owners had to add a 4 ft. sidewalk onto the driveway so two lanes of cars could park. They park on the boulevard as well and street. In order to get out sometimes they cross the grass median to get around other cars. The people living in this house do not look like students.
