

THE CCSVI FOUNDATION OF CANADA

Opening the Pathways of

CHRONIC CEREBRAL SPINAL VENOUS INSUFFICIENCY

- ⦿ A blockage in the veins.
- ⦿ Blood refluxes back up into the brain.
- ⦿ Blood drops the heaviest toxins in the brain and around the nerves.
- ⦿ Body attacks the toxins causing lesions

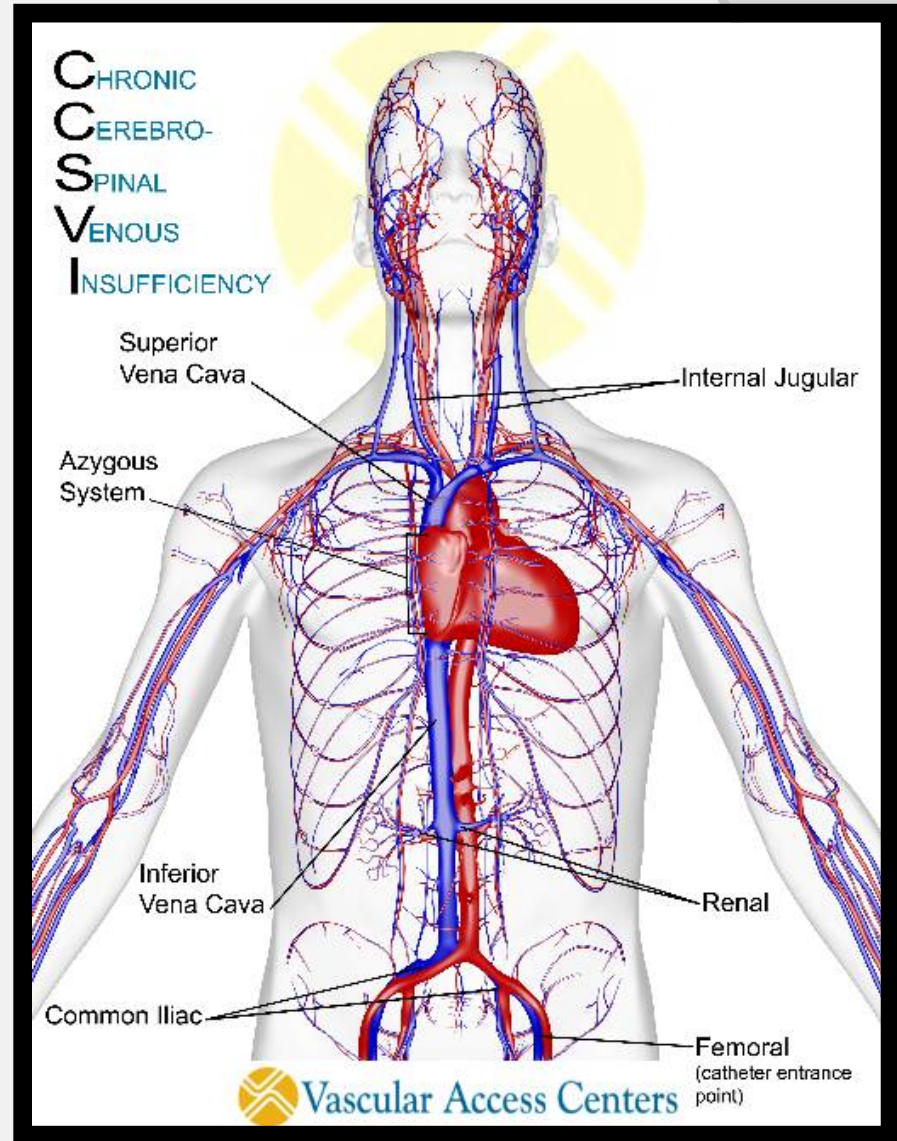

History in the Making

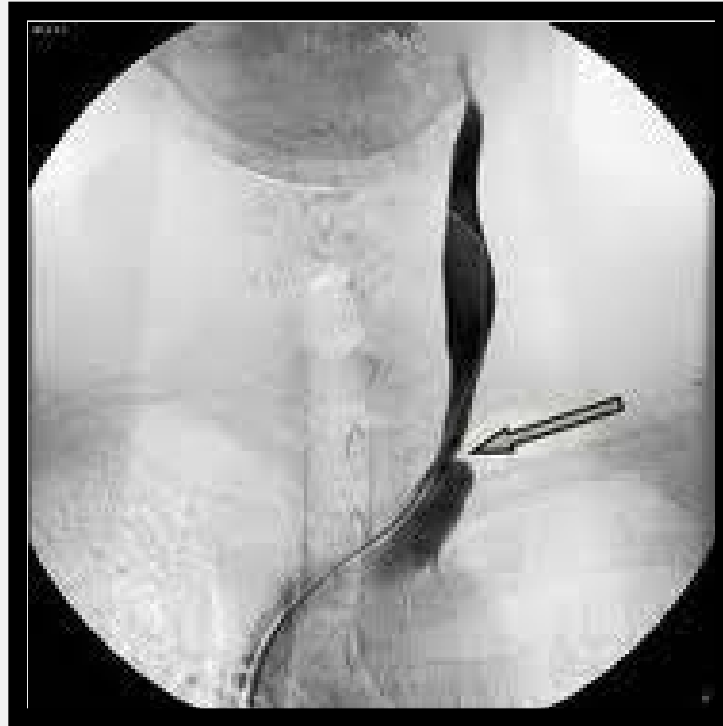

DR. PAOLO ZAMBONI 2009

The Blockages:

- Jugular
- Azygos
- Renal

Improper blood flow

Leaves our brain in a swamp

Improper blood flow associated with:

- ◎ M.S.
- ◎ Alzheimers
- ◎ Parkinson's
- ◎ Chronic Fatigue Syndrome
- ◎ Autism

My Procedure:

- ◎ In Barrie at RVH.
- ◎ 1 of 6 individuals with M.S. in Canada.
- ◎ Dr. Sandy McDonald.
- ◎ No anesthetic.
- ◎ 45 minute procedure / out patient.
- ◎ Immediately regained strength in left hand and more movement in left leg.

Results benefitted over time:

- ⦿ No drugs.
- ⦿ Bladder function returned.
- ⦿ No brain fog.
- ⦿ Speech issues resolved.
- ⦿ No pain.
- ⦿ No muscle spasticity.
- ⦿ No longer waiting to die.

My thoughts on the Clinical Trials

- ◎ Used to substantiate an unproven theory.
- ◎ Canadian trials are being run by a neurologist not an intervention radiologist.
- ◎ Premier Bill Wall from Saskatchewan has sent 86 people from Sask. to New York (Dr. Siskin) to do a properly conducted clinical trial.

We believe the problem lies in the \$\$\$
with big pharmaceutical companies!

"If we offer the treatment to everyone and they all get better, who will be left for the studies?" ~ Dr. TJ (Jock) Murray

Can you believe the statement made by the leading neurologist for M.S in Nova Scotia?
