My name is Larry Gottschalk. I live at facing east for 20 years. 12 stories is criminal. Hundreds of residents will lose our daily sunrises and daily vitamin E. My concerns are 1) Massive loss of Sun 2) Massive Congestion. Parking here is already a mess and Lakhous isn't even open yet! Three or four stories is fine but this proposal includes requests which are totally unreasonable for the neighbourhood. This plan does not fit this mid-block tiny piece of land. This plan does not fit the neighbourhood at all. Almost everything in this proposal is way oversized for this tiny residential strip of land. This proposal is selfishly supporting the private investors first instead of supporting the hundreds of local seniors, already housebound by the pandemic. We can't lose the needed sun we paid for. We need City Employees to HELP EXISTING SENIOR CITIZENS FIRST... NOT INVESTORS. Our mental and physical health will be harmed forever. The Canadian Ministry of Health confirms that the loss of sun encourages depression. This plan ignores residents and is loaded with congestion which is blatant, corporate, disrespectful greed. Citizens first please. For all of us! Larry Gottschalk
